## Swiss tradition, Italian design: Sea-God Portorotondo Limited Edition

17 - 09 - 2013 | 04:12

Sea-God Watches was founded in 2003 born of Enzo Palazzolo's passion for haute horlogerie.

Enzo, a successful entrepreneur and collector of watches wanted to create a range of fashionable timepieces such as the BlackStorm and Portorotondo collections for connoisseurs and enthusiasts, merging Italian style with the best Swiss watchmaking techniques and traditions combined with an elegant sportiness.

It should come as no surprise that Sea-God watches are inspired by the sea, and as a result water is the distinctive symbolic feature. Each high end and yet sporty watch is water resistant to 300 metres. The idea behind Sea God watches is that they can be worn without foregoing the style and elegance which characterises Italian design.
